20th Anniversary, Finally "Real Business" Fair

NANO KOREA 2022

The 20th International Nanotech Symposium & Exhibition

2022. July 6(Wed.) ~ 8(Fri.), KINTEX, Korea.

Hosted by Ministry of Trade, Industry & Energy, Ministry of Science and ICT

Organized by NANO KOREA Organizing Committee(Nano Technology Research Association, Korea Nano Technology Research Society)

Supported by Korea Evaluation Institute of Industrial Technology, National Research Foundation of Korea, Korea Industrial Technology Association, Korea Institute for Advancement of Technology, Korea Institute of Science & Technology Evaluation and Planning, Korea Foundation for the Advancement of Science and Creativity, Advanced Technology Center Association, Korea Trade-Investment Promotion Agency, Nano-Convergence Foundation, Korea Institute of Science and Technology Information, Korea Carbon and Nano Industry Association

Finally "Real Business" NANO KOREA 2022, again!

NANO KOREA will develop forward as a global platform of material, component, and equipment business for future industry innovation. We will provide a bigger and stronger business environment by adding digital solutions to offline exhibitions. Boost up your brand and start a new business at NANO KOREA 2022, with over 15,000 attendees and 400 companies of 30 countries!

Overview

Name : NANO KOREA 2022

The 20th International Nanotech Symposium & Exhibition

Period/Place : 2022. July 6(Wed.) ~ 8(Fri.), 3Days

Goyang-si KINTEX The Exhibition Hall 1

Implementing Organization

Hosted by : Ministry of Trade, Industry & Energy, Ministry of Science and ICT

Organized by : NANO KOREA Organizing Committee(Nano Technology Research Association, Korea Nano Technology Research Society)

Supported by : Korea Evaluation Institute of Industrial Technology, National Research Foundation of Korea, Korea Industrial Technology Association, Korea Institute for Advancement of Technology, Korea Institute of Science & Technology Evaluation and Planning, Korea Foundation for the Advancement of Science and Creativity, Advanced Technology Center Association, Korea Trade-Investment Promotion Agency, Nano-Convergence Foundation, Korea Institute of Science and Technology Information, Korea Carbon and Nano Industry Association

The largest convergence exhibition of
material, component and equipment in Korea

Co-hosting 700 booths with covering 9 new technologies

Exhibition with high quality buyers

15,000 buyers from 30 countries through online/offline

Exhibition with the latest technology trends

Professional events looking into the latest technology and the future

NANO KOREA Facts & Figures

Business Needs

Decision maker participation rate

Among the visitors to the NANO KOREA, effective buyers account for 80% of the total number of visitors, which is in line with the professional business exhibition. It is also the result of program operation such as exhibition technical tour for decision makers of demanding companies and buyer invitation project.

Buyers from all industries

The visitors to NANO KOREA range from materials and chemistry (25%), semiconductors/displays (20%), electrical and electronics (17%), automobiles, energy/environment, bio/healthcare, and other high-tech industries to construction, food and household goods.

Exhibition with actual demand visitors

NANO KOREA's visitors are mainly related to new technology & product development, new business and open innovation. Their most important goal is to collect information on new technologies & products and to network and exchange information with experts in various fields. Recently, the number of investors is increasing to discover new business partners.

Online exhibition service

Even when overseas buyers are restricted from visiting offline exhibitions in the after COVID-19, the NANO KOREA operated the 'online exhibition service', so provided this service to 13 overseas buyers from 9 countries such as BASF(Germany), M&I Materials (US), IBM (USA), Ion Technology(Japan). 90% of participants expressed their satisfaction.

Technology Seeds

Synergy in large-scale convergence exhibition

NANO KOREA is a new technology convergence exhibition covering a total of 9 new technology fields ranging from high-performance adhesive coating film technology to nanotechnology, advanced ceramics, smart sensors, printed electronics, laser technology and surface treatment technology, and the synergy effect is significant.

Industry issues and trends

The NANO KOREA selects an exhibition theme every year by reflecting the technological issues required by the demand industry and the trends of the future industry, and organizes forums, conferences and events to view them, and runs in parallel with the exhibition. This is encouraging the participation of more policy makers and industry leaders, and has the effect of bringing more experts to the showroom.

New Technologies & Start-ups

The NANO KOREA aims to attract investment and technology business for startups with innovative ideas and items as well as excellent commercialization technology. Through this, new technologies and novel commercialization ideas will be showcased in the exhibition hall, and more abundant exhibition contents will be secured, enabling more companies, institutions and investors to view.

Overseas Exhibitors

The NANO KOREA creates a 'Overseas Technology Pavilion' that showcases new technologies and products developed by overseas company such as Japan, Germany, China. In particular, by inviting major companies from advanced countries, It will not only raise the level of technology and products exhibited at the exhibition, but also strengthen the functions of international cooperation and global business.

Preview of Visitors & Exhibitors

Who will visit ?

Industrial customers visiting NANO KOREA 2022 are looking for business cooperation partners who can provide technologies, products, systems and solutions that can secure the company's competitiveness in times of change. Promote your company as a competitive partner and solution provider by participating in offline exhibitions and digital solutions at the NANO KOREA 2022.

Who will exhibit ?

In NANO KOREA 2022, domestic and foreign leading companies and research institutes with high-performance materials, devices, components and systems for each industrial field, from raw materials related to fusion complex processing technology and manufacturing equipment, are participating in large numbers. Take part in NANO KOREA 2022 to enhance your brand and meet new business partners.

Material Chemical Energy

Main Industry (Construction, Machinery, etc)

High-tech industry (Electricity, Electronics, Bio)

Material Components Equipment

Large and medium-sized companies

Institution Research University

The best exhibition that enhances your competitiveness Get Started at NANO KOREA

01

Practical Business

Meet experts from major domestic and foreign research institutes such as KIST and ETRI as well as large companies such as Samsung Electronics, LG Electronics, and Hyundai Motors on site!

02

Efficient Promotion

Show off your innovative technologies and products offline and maximize your publicity through a variety of online solutions!

03

Powerful Branding

Secure internal and external trust in your technology and products and strengthen the brand of an innovative company with global competitiveness!

04

New Networks

Announce your business model and items on/off-line and build a new business partner network with leaders in various fields!
